Drop-off Electronics for Possible Reuse

We will take:

Computers, monitors, keyboards, printers, televisions, radios, cell phones, laptops, DVD players, camcorders, VCR's, stereos, loose electronic parts, working or not—no age limit. All items that can't be reused will be recycled by WTP, a state certified recycler. All hard drives are wiped or destroyed. Nothing goes to the landfill!

Reuse is 25 times better for the environment than just recycling . There are millions of families that can't afford computers. Computers for Classrooms needs 550 computer monitors for the computer systems we are giving free to low-income middle school students. Please, help us and clean out that garage or closet. Help us to close the digital divide and give everyone access to technology.
